

MOBILE SALES DASHBOARD REPORT

Created By:

Prabha Ravindra Shelake

Tools Used:

- Power BI
- Excel / CSV
- DAX
- Data Visualization

Project Type:

Sales Analytics Dashboard

INTRODUCTION

This project presents a Mobile Sales Dashboard developed using Power BI.

The dashboard helps analyze sales performance, transaction details, customer ratings,

payment methods, and monthly sales trends through interactive visualizations.

The main purpose of this dashboard is to convert raw sales data into meaningful business insights

that help in better decision-making and performance analysis.

OBJECTIVES

Objectives of the Project

- To analyze total mobile sales and transactions
- To monitor monthly and yearly sales performance
- To compare sales with same period last year
- To analyze customer ratings and payment methods
- To identify top-performing mobile brands and models
- To create an interactive and user-friendly dashboard

Dashboard Overview (FIRST IMAGE)

The main dashboard provides a complete overview of mobile sales performance.

It contains KPI cards, maps, charts, slicers, and tables for interactive analysis.

Key Insights:

- Total Sales reached 69M
- Total Quantity sold was 2K
- Total Transactions were 324
- Average Sales value was 40K

Visualizations Used:

- KPI Cards
- Map Visualization
- Line Chart
- Pie Chart
- Bar Chart
- Table Visual
- Slicers and Filters

The dashboard also allows filtering data by:

- Mobile Model
- Payment Method
- Brand
- Month

MTD REPORT ANALYSIS (SECOND IMAGE)

MTD (Month-to-Date) Report Analysis

This page focuses on month-to-date sales analysis.

It helps track daily sales growth and monitor current month performance.

Key Insights:

- Total Sales reached 23M
- Total Quantity sold was 531
- Total Transactions were 109
- Average Sales value was 42K

The line chart displays:

- Daily sales trends
- MTD growth patterns
- Sales fluctuations during the month

This report helps businesses:

- Track short-term sales performance
- Identify peak sales days
- Monitor current month progress

SAME PERIOD LAST YEAR ANALYSIS (THIRD IMAGE)

Same Period Last Year Analysis

This report compares current year sales with previous year performance. It helps evaluate business growth and yearly trends.

Key Insights:

- Total Sales reached 253M
- Total Quantity sold was 6K
- Total Transactions were 1K
- Average Sales value was 40K

The report includes:

- Quarterly comparison
- Monthly comparison
- Total sales vs same period last year
- Growth analysis charts

Benefits of this analysis:

- Measures business growth
- Identifies seasonal trends
- Helps in forecasting future sales
- Supports strategic business decisions

CONCLUSION

The Mobile Sales Dashboard successfully transforms raw sales data into meaningful insights through interactive visualizations and analytical reports.

The dashboard helps in:

- Monitoring sales performance
- Understanding customer behavior
- Comparing yearly growth
- Tracking monthly trends
- Improving decision-making

This project demonstrates practical knowledge of:

- Power BI
- Data Visualization
- Dashboard Design
- DAX Calculations
- Business Analytics
